

CAIRON MiGlobal

Smart MiFi Global Hotspot for Business

SMART MIFI GLOBAL HOTSPOT

Global Data Platform for Business

Corporate model enables Corporations with a certain number of employees who travel frequently to cut off their internal travelling expenses. Corporations usually buy out needed amount of Global Boxes and assign them to their employees. One Global Box unit can be assigned to multiple users.

The individual data consumption needs will be estimated on monthly basis and inform CAIRON upon such. Once CAIRON has the knowledge upon Corporations data needs, CAIRON ensures Corporations the data pool.

Corporate model is mainly post-paid

Invoice for the data consumed by the Corporation will be transmitted by CAIRON at the end of each month. Corporations will be assigned by a CAIRON Business Account which they may access throughout CAIRON web site and have a full access to their data consumption tracking the same as to units / sub-accounts control. If required, CAIRON can put a CAP on a data consumption.

Highly secured and private

CAIRON's connection is highly secured and private. Therefore, Business Account shows solely data consumption per unit, per account, per country, per time.

CAIRON provides Business Account Manual and the training of a person in charge of the assigned Business Account. CAIRON also provides technical and customer service support and 24/7 assistance

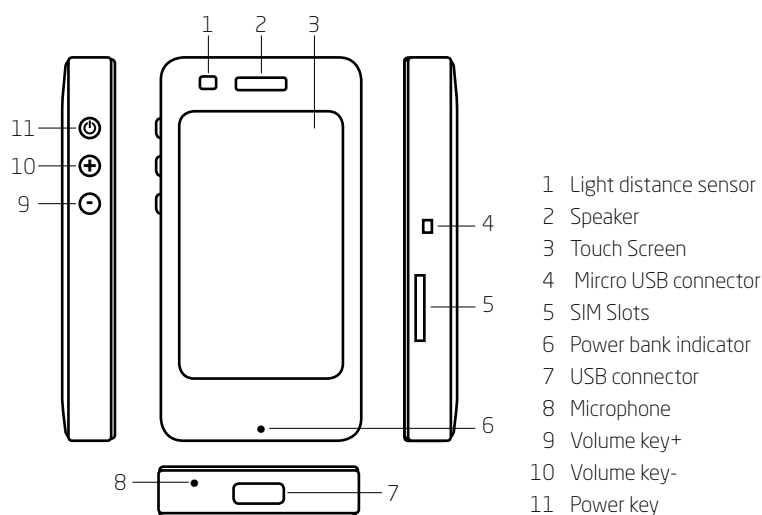

Average savings

Average savings with CAIRON technology are 40-60% from existing spendings. CAIRON will educate Corporation upon all information throughout the training.

CAIRON is also enabling VoIP (voice over data) within its APP, so CAIRON's Clients are able to do regular talks and texts throughout the data (wi-fi).
